Year of Record. In all tables, the particulars shown relate to the year ended 30 June.

Sources of Statistics. Overseas trade statistics are compiled from documents obtained under the 'Customs Act 1901-1968' and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Customs and Excise. Particulars of Western Australia's overseas trade, as presented in this publication, have been prepared from data furnished by the Commonwealth Statistician, Canberra.

Statistics of Western Australia's trade with other Australian States are compiled by the Western Australian Office of the Bureau of Census and Statistics from information contained in documents collected under authority of the 'Census and Statistics Act 1905-1966' from importers, exporters, and other persons concerned with the distribution of goods.

Classification of Commodities. Overseas trade statistics for years up to and including 1964-65 were compiled according to a Statistical Classification of Imports and Exports which, in 1964-65, contained approximately 3,700 items of import and 1,300 items of export.

On 1 July 1965 a new Australian Customs Tariff was introduced. The nomenclature used in the Tariff is that of the Convention on Nomenclature for the Classification of Goods in Customs Tariffs, an international agreement signed at Brussels on 15 December 1950. The system of naming established by the Convention has come to be known as the 'Brussels Nomenclature'.

From 1 July 1965, imports into Australia have been classified according to an 'Australian Import Commodity Classification' of some 5,000 items based on the 'United Nations Standard International Trade Classification, Revised', which closely follows the Brussels tariff nomenclature.

A new 'Australian Export Commodity Classification' of some 2,000 items, also based on the Standard International Trade Classification, was introduced on 1 July 1966.

The Standard International Trade Classification consists of 10 broad commodity categories designated 'Sections' and comprising 66 commodity 'Divisions' which are further divided into 177 commodity 'Groups'. The structure of the classification serves to provide a summary of data relating to 1,312 basic items of international trade.

For the purpose of recording details of Western Australia's trade with other Australian States, a revised Interstate Trade Classification based on the new Australian Commodity Classifications has been prepared in the Western Australia Office of the Bureau. In compiling this document, the basic items of the Australian Classifications have been compressed or expanded according to their significance in Western Australia's trade. The Interstate Trade Classification comprises some 860 items of import and 370 items of export within the structure of commodity Sections, Divisions and Groups referred to previously. The revised Interstate Trade Classification was first used in compiling details of Western Australia's trade with other Australian States in respect of the year 1965-66.

The commodity descriptions appearing in some of the tables which follow are, in some cases, abbreviations of the full text, which is available in the 'Australian Import Commodity Classification' and the 'Australian Export Commodity Classification'.

Tables 8 and 9. The reference numbering systems used in Tables 8 and 9 serve to identify statistical items contained in the Interstate Trade Commodity Classification and the Australian Import and Export Commodity Classifications. In each system the first digit denotes the Section, the first two digits the Division, and the first three digits the Group. These are identical with the Sections, Divisions and Groups of the Standard International Trade Classification. In respect of interstate trade the fourth and fifth digits denote the statistical item in the Interstate Trade Commodity Classification. In the case of overseas trade the fourth and fifth digits serve to identify the items in the Standard International Trade Classification. The seven digits, which are used to denote the statistical item, correspond to those used by the Commonwealth Statistician in the publication 'Overseas Trade, 1971-72: Bulletin No. 69'. For presentation in Tables 8 and 9 the detailed statistics contained in the bulletin have been condensed by combining some items of overseas trade under a single reference number. In some instances the symbol + appears in the place of the seventh digit, indicating that the particulars shown against that number refer to a combination of items which have reference numbers with common digits up to the sixth. Similarly, the symbol ++ appearing in place of the sixth and seventh digits indicates a combination of items having reference numbers with the first five digits in common. A dash (-) appearing in the Reference Number column indicates that the figures shown relate to a collection of heterogeneous items of overseas trade for which there is no appropriate single reference number.

Where the value of imports from, or exports to, a country in 1971-72 was less than \$1,000 for a particular item, the country is not listed separately, and the value concerned is included in the figures shown against 'Countries under \$1,000'.

Although the information presented in Tables 8 and 9 is confined to the year 1971-72, comparable data are available for certain earlier periods. Details of imports and exports during 1968-69, 1969-70 and 1970-71 were published in 'Statistics of Western Australia - Trade'. Similar details of imports and exports for the years up to and including 1967-68 (apart from the exceptions mentioned below) were published in 'Statistical Register of Western Australia: Part IV - Trade, Transport and Communication' (the previous title of this publication). Comparable data of imports during 1965-66 and 1966-67 and of exports in 1966-67 are available on request from records held in the Western Australian Office of the Bureau. See also preceding section 'Classification of Commodities'.

Detailed particulars of overseas imports and exports for each of the Australian States, and for Australia as a whole, are available up to 1969-70 in the bulletin 'Overseas Trade', published annually by the Commonwealth Statistician, Canberra. Subsequent publications contain details for Australia only, particulars for each of the Australian States being available on request from records held in the Western Australian Office of the Bureau.

Tables 12 and 13. The numbering system used in Tables 12 and 13 comprises up to five digits. The first digit denotes the Section, the first two digits the Division, and the first three digits the Group. These are the Sections, Divisions and Groups of the Standard International Trade Classification. The fourth and fifth digits serve to identify the statistical item in the Interstate Trade Classification. In some cases the symbol + appears in place of the fifth digit, indicating that the particulars shown against that number refer to a combination of items which have reference numbers with common digits up to the fourth. Similarly, the symbol ++ appearing in place of the fourth and fifth digits indicates a combination of items having reference numbers with the first three digits in common. A dash (-) appearing in the Reference Number column indicates that the figures shown relate to a collection of heterogeneous items for which there is no appropriate single reference number.

Additional information relating to Western Australia's trade with other Australian States appears in the mimeographed publication 'Interstate Trade of Western Australia', issued annually by the Western Australian Office of the Bureau.

In tabulating particulars of Western Australia's interstate trade, statistics relating to trade with the Australian Capital Territory are included with those of New South Wales.

Index to Articles of Trade. The index appearing on pages 6-14 is specifically designed to identify the detailed items contained in Tables 8 and 9. However, the five-digit interstate trade reference numbers shown in Tables 8 and 9 are identical with those appearing in Tables 12 and 13 (except as indicated above in the note 'Tables 12 and 13').

Entries in the index are arranged in alphabetical order. Listed against each entry is a three-digit reference number which represents a group number in the Standard International Trade Classification. The symbol (I) appearing after a reference number indicates that the number relates only to imports. Similarly, the symbol (E) identifies those items which relate only to exports. No distinction is made if both imports and exports are recorded for a particular item.

Units of Quantity. Quantities are generally, but not invariably, expressed in terms of the normal trade unit. Where 'cental' is used, the unit is equivalent to 100 lb avoirdupois. 'Gallon' refers to the imperial gallon of 277 $\frac{1}{4}$ cubic inches capacity.

Quantities are not given in cases where there is no appropriate common unit (for example, an item or a Section such as Section 7 - 'Machinery and transport equipment', which covers a number of disparate commodities that cannot be recorded under a uniform unit of quantity).

Valuation of Items of Trade. All values are recorded in Australian currency. The basis of valuation used, except in the case of imports from other Australian States, is f.o.b., or its equivalent, at the point of final shipment. Statistics of imports from other Australian States are recorded in terms of landed cost.

Direction of Trade. The term 'Country of Origin', as used in recording statistics of overseas trade, means the country of production; 'Country of Destination' means the country to which goods were consigned at the time of export. In compiling statistics of Western Australia's interstate imports and exports, goods are classified according to the State or Territory from which or to which they were consigned.

Country of Origin or Destination: The Arab Republic of Egypt, as shown in current tables, was formed on 3 September 1971, and comprises the former countries of Libya, Syria and the United Arab Republic of Egypt. In addition the Trucial States was renamed the Union of Arab Emirates on 2 December 1971. The former province of East Pakistan was formally recognised as the independent State of Bangladesh by Australia on 31 January 1972. Subsequent to the 1970-71 issue of this publication, the names of the countries shown below were also altered. However, because of technical difficulties the former names of these countries have been retained in the tables in this bulletin.

Cambodia, now known as the Republic of Khmer.
Muscat and Oman, now known as Oman.

In tabulating particulars of Western Australia's interstate trade, statistics relating to trade with the Australian Capital Territory are included with those of New South Wales.

Reimports. Goods classified as reimports consist of articles exported from Australia and subsequently reimported into Western Australia. The country of origin, in these cases, is shown as 'Australia (reimported)'.

For Orders. Where the country of destination is not determined at the time of consignment the goods are recorded as exported 'For Orders'.

Geographic Trade Areas. The geographic trade areas shown in the tables are based on the 'Classification of Geographic Trade Areas for Shipping Statistics' used by the Commonwealth Statistician, Canberra in recording overseas shipping cargoes. Geographic trade areas, as detailed in Tables 2, 3 and 4, comprise only those countries with which Western Australia engaged in trade during the three-year period ended 30 June 1972.

Ships' Stores. The term 'Ships' Stores' describes stores loaded on board ships and aircraft and includes bunker coal and oil. Export figures exclude the value of ships' stores, details of which are supplied separately in Table 17, page 177.

Rounding of Figures. Values have been rounded to thousands of dollars without making those adjustments which would be needed to make the rounded figures add to the rounded totals. It is for this reason that figures do not always add to the totals shown in the tables.

Abbreviations and Symbols

'n.a.' denotes 'not applicable'.
'n.e.i.' denotes 'not elsewhere included'.
'China, Rep. of (Taiwan)' refers to the Republic of China (Taiwan).
'Christmas Is.' refers to Christmas Island (Indian Ocean).
'Germany, Fed. Rep. of' refers to the Federal Republic of Germany.
'Reunion and Southern Is. Fr.' refers to Reunion and Southern Islands (French).
'U.S.S.R.' refers to the Union of Soviet Socialist Republics.
The symbol - in the 'Quantity' column denotes 'nil' quantity or 'quantity not recorded'.

Metric Units of Quantity

'kg' denotes kilogram. One kilogram = 2.2 lb approximately.

NOTE. In addition to the preceding publications, a number of bulletins which deal exclusively with this State are produced by the Commonwealth Statistician, Canberra, who also issues many publications which contain particulars for Western Australia as a component of Australian totals. A complete list of all publications currently issued by the Central and the various State Offices of this Bureau appears in 'Publications of the Commonwealth Bureau of Census and Statistics' issued by the Commonwealth Statistician, copies of which are available free of charge from the Western Australian Office at the address shown on page 186.
